

PIGEONS

DO NOT FEED OR LEAVE OUT WATER

Village IV homeowners have shared many concerns with the nuisances of pigeons throughout the community. To date the Board of Directors has spent \$10,000 to have an expert pigeon vendor place netting and mesh in many of the under shots within the community. These areas were identified as the most ideal location for nesting. There have been cement blocks placed between the spa and the pool, as well as the draining of the fountain to eliminate the water source. We ask for ALL homeowners and tenants to not feed the birds or leave out water.

The Board is taking this very seriously and will be a fining of \$300 per day for any Unit having out water or food for the pigeons and birds.
