VRA Greenway Project

After many years of discussion and planning, the VRA Board is pleased to announce the opening of the Reserve funded Greenway project.

To conserve on water usage, the plan included:
-Reducing 20,000 s.f. of grass and receiving a $40,000 rebate from Scottsdale Water
-Adding soil turf improvements that help with water absorption in the soil.
-Adding new grass seed that takes less water to maintain
-Upgrading the irrigation system with smart control technology

To upgrade the common area for all to enjoy, the plan included:
-Adding a connecting walking path thru the Greenway
-Adding seating areas and tables to make it easier to spend time in the Greenway
-Adding 20 trees for additional shade and 54 low water usage plants
-Adding low voltage lighting along the path for safety

To allow the roots of the new grass to become stronger, the VRA will not be overseeding this area in the fall. Next year we will have year round grass again.

We hope that you will enjoy spending time in the Greenway!
